## Status on Bc → J/psi e X decay (Masato Aoki)

- electron ID efficiency
- fake rate for Pion, Kaon, Proton
         (each charge)

  << 5.3.1 data

1, b-bbar background (working…)
2, conversion background (not yet)
3, fake electron background (not yet)

Delta Phi (J/psi - electron) [5.3.3 cdfGen]

- resolve BUGs in Pythia
- generate realistic MC (almost done)

People working with me were back
to their countries…
